# Malisetti Obulamurthy

Front-End Developer

Experienced Front-End Developer with over 8 years in crafting responsive web applications using Vue.js and React.js. Led development of interactive modules and implemented design patterns for effective state management. Specialized in creating responsive user interfaces and integrating APIs to enhance project success.

## WORK EXPERIENCE

### Technical Lead

Wissen Infotech Pvt. Ltd.

*01/2022 - Present* *Bangalore, India*

- Improved UI performance through thorough validations and efficient API integrations.
- Developed reusable components, integrating Redux to streamline state management.
- Ensured responsive UI across browsers by integrating REST APIs.
- Designed modular Vue components and managed workflows with Vuex.

**Service Catalog**

- Architected a scalable React.js front-end framework with Redux-driven state management that streamlined internal employee service management, improving resource accessibility and reducing administrative overhead.
- Engineered a library of reusable React components and Redux business logic, significantly accelerating development velocity for future portal enhancements.

**RAMP (Regulatory Airworthiness Management Portal)**

- Engineered a high-performance, data-dense dashboard in Vue.js with a suite of accessible, reusable UI components (advanced tables, file uploaders, and complex expansion panels) that standardized user interactions across the application.
- Implemented complex workflow-driven validations and dynamic form elements backed by centralized Vuex state management, ensuring 100% adherence to rigorous aviation safety and regulatory compliance standards.

**DP (Design Practices - DPSys)**

- Served as an individual contributor, architecting and developing end-to-end documentation workflows in Vue.js that optimized the management of critical engine design documents.
- Streamlined multi-level approval cycles using robust Vuex state management and automated document routing, significantly enhancing compliance and operational efficiency for enterprise engineering teams.

### Senior Analyst

Fidelity National Financial India

*07/2020 - 02/2022*

### Analyst

Fidelity National Financial India

*08/2017 - 01/2020*

- Performed detailed title examinations and legal document analysis, ensuring data accuracy, compliance, and efficient processing of property transactions.

## CERTIFICATES

### AI & Agents: From Talking to AI to Building One (05/2026 - 06/2026)

- Acquired practical insights into AI agents, LLMs, Retrieval-Augmented Generation (RAG), and AI automation tools, including key concepts like temperature and context windows.

## EDUCATION

### Bachelor of Technology (B.Tech)

JNTU Anantapur

*08/2013 - 04/2016*

## SKILLS

React.Js · React Native · Redux · Redux Toolkit · Vue.js · Vuex · Vuetify · Pinia · JavaScript · TypeScript · HTML · CSS · Tailwind CSS · GSAP · Three.js · Node.js · Express · Generative AI · Postman · git · Design Practices · SOLID Principles

## PROJECTS

### Lumo Rentals

lumo.rentals

- Architected and developed a multi-vehicle travel platform for booking bikes, cars, and tempo vehicles.
- Engineered cross-platform mobile applications, published and maintained on both the Google Play Store and Apple App Store.

### Lisno India

lisno.co.in

- Building a full-stack platform for a Bangalore interiors and engineering studio — services, a filterable project portfolio and 3D room walkthroughs.
- Implemented the front end in React with Redux Toolkit and GSAP ScrollTrigger, against a Node.js and Express API.

### WanderLux Journeys

tourism-3d.onrender.com

- Built a scroll-driven 3D web experience for a travel and tourist-management brand — a five-chapter journey through India rendered in WebGL.
- Implemented the 3D scenes and scroll choreography in React with Three.js and Vite.

### Good Plastics

good-plastics.onrender.com

- Built a comprehensive web platform for a bioplastic manufacturer, highlighting sustainable PHA alternatives.
- Implemented features to effectively showcase product portfolios, service catalogs, and consulting capabilities.

### Bio Specimen

biospecimensolutions.in

- Developed a specialized web solution for a clinical research organization, focusing on biospecimen collection and pharmaceutical development services.
- Designed the interface to clearly communicate complex processes such as PBMC/BMMC isolation and clinical trial support.

## INTERESTS

- Generative AI and AI Agents
- Software Engineering Best Practices
- AI-Driven Automation
